Summary

Data Analyst with a strong foundation in SQL, Power BI, and Python passionate about transforming complex datasets into actionable business strategies. Recently graduated with a master's in data science from the Rome Business School. Currently pursuing a professional certificate in data analytics by Imperial College Business School. Holding dual Brazilian / Portuguese citizenship and accustomed to multicultural environments across Brazil, Italy, Germany.

Technical Competencies

Languages & Querying: SQL, Python (Pandas, NumPy, Scikit-learn)

Machine Learning & AI: Regression, Classification, Clustering

Data Analysis & Visualization: Power BI, Matplotlib, Seaborn, Tableau, Advanced Excel

Methodologies: Agile Methodology

Big Data Tools: Data Lake, Data Warehouse

Cloud infrastructure: Cloud fundamentals (AWS, Azure, Google Cloud)

Databases/Warehouses: PostgreSQL, MySQL, SQL Server

Version Control & DevOps: Git/GitHub

Mathematics & Statistics: Probability, Linear Algebra, Hypothesis Testing, Statistical Inference

Education

Rome Business School - Rome/Italy

International Master in Data Science

October 2023 - October 2024

- Accomplished a comprehensive end-to-end data strategy as measured by the successful defense of a Capstone Project on "Customer Retention & Predictive Churn Analytics".

Faculdade São Bernardo do Campo - São Bernardo do campo/Brazil

Bachelor's in Business Administration,

January 2017 - December 2022

- Gained a strong foundation in business operations and strategic planning as measured by the completion of a multi-disciplinary curriculum focused on organizational efficiency and financial management.

Certifications & Professional Development

Imperial College Business School

Professional Certificate in Data Analytics

October 2025 - May 2026

Courses

DataCamp

Data Analytics Training- Power BI Data Analyst, SQL Data Analyst, Python Data Analyst

Languages

Portuguese: Native

English: Advanced

Italian: Advanced

Spanish: Intermediate

German: Basic

Projects & Business Cases

Football Player Market Valuation Model | Python, XGBoost, Predictive Analytics | [Github](#) | [Streamlit App](#)

- Developed a robust Machine Learning model utilizing XGBoost to accurately predict player market values by extracting and processing complex performance datasets from Transfermarkt.
- Delivered a comprehensive executive summary and technical presentation, translating advanced feature importance into strategic scouting and investment insights for sports management.
- Tech: Python (XGBoost, Pandas), Machine Learning, Predictive Modeling, Data Storytelling.

Geopolitical Events & Commodity Trends Analytics (Geovex) | BigQuery, Python, SQL | [On going project](#)

- Architected an automated data pipeline using Google BigQuery to ingest and filter massive global news datasets, ensuring high-quality data readiness for market analysis.
- Engineered predictive analysis workflows in Python to correlate international geopolitical conflicts with commodity price fluctuations (oil, gold), delivering actionable insights for strategic positioning.
- Tech: Google BigQuery, Python (Pandas, Scikit-learn), SQL, Data Engineering, Machine Learning.

Customer Retention & Predictive Churn Analytics (Master's Capstone Project) | Power BI, DAX, CRISP-DM | [Github](#) | [Medium](#)

- Architected an end-to-end Business Intelligence (BI) Solution to identify churn risk and optimize Customer Lifetime Value (CLV) by analyzing 19,000+ e-commerce transactions.
- Translated Python-based Machine Learning outputs (XGBoost/Logistic Regression) into a geo-strategic action plan, prescribing targeted retention campaigns for 4 European market clusters to drive revenue growth.
- Tech: Power BI, DAX, Python (XGBoost, Scikit-learn), CRISP-DM..

Credit Risk & Default Prediction Analysis | [Github](#) | [Medium](#)

- Designed a data-driven risk assessment model as measured by the precise evaluation of default probabilities to optimize credit allocation strategies and financial decision-making.
- Engineered predictive modeling structures as measured by the identification of high-risk credit profiles by performing exploratory data analysis (EDA) and rigorous risk classification.
- Tech: Data Analytics, Risk Modeling, Python, Power BI.

Supply Chain & Logistics Optimization | [Github](#) | [Medium](#)

- Developed an operational analytics solution as measured by the identification of supply chain bottlenecks and the resulting improvements in logistical efficiency.
- Optimized delivery performance tracking as measured by real-time visibility into logistical KPIs by implementing automated data-cleansing and performance-monitoring workflows.
- Tech: Data Analytics, Performance Tracking, Python, Power BI

Professional Experience

Coveract SRL

Turin, Italy

Quality & Data Analyst

July 2025 – December 2025

- Guaranteed component quality and safety for BMW production by executing rigorous inspection protocols and functional tests.
- Mitigated production risks by identifying anomalies and non-conformities through precise technical analysis and control chart monitorings.
- Contributed to data integrity for quality reports as measured by accurate logging of defect rates by documenting production outcomes in the internal tracking system.
- Identified recurring defects during quality audits to drive continuous process improvements and enhance production reliability.

Micla Engineering and Design

Turin, Italy

Consultant

August 2023 – February 2024

- Improved testing reliability for Italdesign Giugiaro through the strategic coordination of complex durability test procedures and precision-focused outcomes.
- Reduced processing bottlenecks by streamlining test management workflows and implementing continuous process improvement strategies.
- Ensured high-precision data integrity by auditing cross-functional technical documentation against strict project specifications.

Zenatur

São Bernardo do Campo, Brazil

Business Assistant

2022

- Achieved a 100% on-time delivery rate for Samsung promotional materials by coordinating complex distribution schedules across Brazil.
- Enhanced brand visibility at major events (e.g., Brasil Game Show) as measured by successful material deployment by managing end-to-end promotional logistics.
- Achieved superior inventory accuracy by optimizing supply chain oversight and significantly reducing material loss during transit.

T-Systems do Brasil

São Bernardo do Campo, Brazil

Intern

2019 –2021

- Facilitated global service delivery operations as measured by seamless collaboration across international clusters, demonstrating high-level stakeholder management through daily synchronization meetings, and proactive incident management support.
- Optimized communication flow between Service Delivery Managers (SDMs) and technical teams as measured by the reduction in information silos by standardizing reporting protocols.
- Supported large-scale IT service management functions as measured by the timely completion of administrative and operational milestones by assisting in global project tracking.
